### **CORPORATE BACKGROUNDER INNOTECH SYSTEMS INC.**

**Port Jefferson, New York** (December 15, 2002) — While not a household name, Innotech Systems Inc. has been a premier supplier of custom remote controls and remote control technology for nearly ten years. Innotech Systems has developed a worldwide recognition as one of the foremost leaders in infrared remote control and wireless technology.

Innotech Systems Inc. (ISI) has engineered specialty remote controls that are among the most popular remote control models of all time; a unique one-button remote for cognitively disabled users; and conventional remote controls and receivers used in the most advanced consumer and commercial applications worldwide by some of the most prestigious names in the industry.

More recently, Innotech's voice-operated remote controls have created a whole new category and established a new standard for the remote control industry.

Innotech Systems maintains two facilities, conveniently located in Boston and suburban New York. The New York facility is our headquarters and the base of operations for our infrared remote controls, and their Boston design center specializes in ASIC design and development. In addition, ISI has an ongoing partnership with multiple overseas manufacturers to ensure quality production of remote controls at any required volume.

Essential to customer satisfaction with universal remote controls is the quality of the library of infrared remote control codes it contains. The Innotech Systems Inc. (ISI) infrared remote control code library is among the most comprehensive available anywhere in the world. The company takes great pains to ensure that it is extremely accurate and up to date, and has licensed its code library to leading worldwide electronic companies.

Privately held, Innotech Systems was founded in 1991. For more information, visit the Innotech Systems Inc. website at [www.innotechsystems.com](http://www.innotechsystems.com).
