- ◆ Combines Innotech's acclaimed remote control code library with powerful IR learning capability
- ◆ Retains learned codes even with battery removed
- ◆ Button-Key Positions, LCD display, and functional operation customized for your individualized look and feel

## DESCRIPTION

Innotech Systems' Touch Screen Technology provides the high-tech look, operation, and flexibility of touch screen operation along with the ease-of-use and easy set-up of conventional universal remote controls.

Innotech Systems' Touch Screen Technology tailors each design to your individual requirements. Innotech can supply the complete remote control or provide the customized electronics to match your enclosure.

For a remote control solution that will never be outdated, the Touch Screen Technology combines the ease of use of library-based operation with the universality of a learning remote control.
